SUMMARY

Undergraduate Informatics student at Universitas Teknologi Digital Indonesia with a focus on UI/UX Design. Experienced in designing wireframes, high-fidelity prototypes, and design systems using Figma for various types of digital products, ranging from mobile apps and dashboards to web-based reporting systems. Accustomed to conducting user research, developing user personas and user flows, and running usability testing to ensure intuitive and user-friendly design solutions. Focused on visual consistency, implementation of design tokens, and close collaboration with development teams across various academic projects.

EDUCATION

UNIVERSITAS TEKNOLOGI DIGITAL INDONESIA

Bachelor of Informatics

Cumulative GPA: 3.67/4.00

Relevant Coursework: Algorithms & Data Structures, Data Visualization, Big Data, Operating Systems, Distributed Systems, UI/UX, Artificial Intelligence, Cybersecurity and Threat Intelligence.

Yogyakarta

Sep 2023 - Present

PROJECT EXPERIENCE

RAPID HANDLING SYSTEM

Yogyakarta

Jun 2026

- Designed a mobile app prototype for UTDI's Sexual Violence Prevention and Handling Task Force (Satgas PPKS) to speed up case reporting and handling processes.
- Created an interactive interface design in Figma with a navy and gold visual identity, complete with design tokens and component specifications for easy implementation by the development team.
- Developed user navigation flows (user flow) to ensure the reporting process was fast, easily accessible, and maintained the confidentiality of the reporter.

APK KULIAH

Yogyakarta

Jun 2026

- Designed the UI/UX for the "APK Kuliah" mobile app, a solution for managing student academic activities (class schedules, assignments, and grades), using Figma.
- Built low-fidelity wireframes through to interactive high-fidelity prototypes with a simple navigation flow (user flow) that was easy for students to follow.
- Developed a design system (typography, color palette, and reusable components) to maintain visual consistency across all app pages.

SMART CITY MOBILE APP

Yogyakarta

Oct 2025

- Conducted user research and created user personas to understand the needs of the target audience.
- Created low-fidelity wireframes through to interactive high-fidelity prototypes using Figma.
- Tested the prototype through Usability Testing sessions to evaluate the effectiveness of the navigation flow and ensure the interface was easy for target users to understand.

ACADEMIC EXPERIENCE

TEACHING ASSISTANT – DATA STRUCTURES

Sep 2025

- Facilitated the understanding of 37 students in complex algorithm concepts (Linked List, Stack, Queue, Tree) using the Java language.
- Translated abstract programming logic concepts into simple, visual explanations that were easy for students to understand.
- Accurately managed student grades and attendance administration using Spreadsheet and E-learning.

TEACHING ASSISTANT – PROGRAMMING PARADIGMS

Sep 2025

- Assisted in teaching advanced Java programming material including recursion, sorting, searching, data structures, and algorithmic problem solving.
- Supervised lab practicum sessions and evaluated students' practicum reports.
- Guided students in applying algorithmic thinking to solve real-world programming problems.

ADDITIONAL EXPERIENCE

INFORMATICS & COMPUTER STUDENT ACTIVITY UNIT
Organizational Advisory Board

Yogyakarta
Aug 2024 - Present

- Provided strategic advice to the organization's board in developing work programs and making decisions.
- Evaluated the implementation of organizational activities to ensure alignment with the organization's vision, mission, and rules.
- Provided input and recommendations to improve the effectiveness of work programs and organizational governance.
- Supported the organization's sustainability through mentoring, coordination, and communication with the board and members.

MASTER of CEREMONY
Universitas Teknologi Digital Indonesia

Yogyakarta

- Served as Master of Ceremony for various official campus events, including Graduation, Anniversary Celebration (Dies Natalis), and PESONA (Campus Study Introduction and Orientation).
- Led the course of events with effective communication, good time management, and coordination with the committee and speakers.
- Demonstrated public speaking skills, event management, and adaptability in handling various situations during events.

EVENT DIVISION STAFF – UNIVERSITY GRADUATION
Universitas Teknologi Digital Indonesia

Yogyakarta
Oct 2025

- Participated in the planning and implementation of the University Graduation event series.
- Coordinated with cross-divisional committee members to ensure all agenda items ran on schedule.
- Organized technical readiness and event flow to support the smooth running of the graduation ceremony.
- Helped resolve operational issues quickly and effectively during the event.

SKILLS

Design Tools: Figma, FigJam, Adobe XD, Canva
UI/UX Methodology: Wireframing, Prototyping, Design Thinking, Human-Centered Design
Research & Testing: User Research, User Persona, User Flow, Usability Testing
Design System: Design Token, Component Library, Style Guide, Responsive Design
Tools & Platforms: Zeplin, Notion, Git, GitHub, Visual Studio Code, HTML/CSS (basic implementation)
Soft Skills: Problem Solving, Public Speaking, Teamwork, Time Management, Communication
Languages: Indonesian (Native), English (Intermediate)
Certifications:

- Basic Web Programming – Dicoding | 2025
- Introduction to Information Security - Cyber Academy | 2026
- Panelist Youth Techbridge 2026: Developing Digital Leaders Across Borders – KKTM | 2026
